TSA Pre✓® expands to include Aeromexico, Cape Air, Etihad Airways and Seaborne Airlines

WASHINGTON — The Transportation Security Administration (TSA) today announced the expansion of TSA Pre✓® to include eligible customers of Aeromexico, Cape Air, Etihad Airways and Seaborne Airlines.

[TSA Pre✓®](#) is an expedited screening program that enables low-risk travelers to enjoy a smart and efficient screening experience at more than 160 U.S. airports. For TSA Pre✓® travelers, there is no need to remove shoes, 3-1-1 liquids, laptops, light outerwear or belts.

“Expanding TSA Pre✓® will enable more travelers to experience the program’s benefits while improving security and reducing checkpoint wait times,” said TSA Administrator Peter Neffenger. “As more people enroll, we will be better positioned to increase overall security effectiveness and create more efficiency in the screening process.”

Today’s announcement makes a total of 16 carriers that participate in TSA Pre✓®: Aeromexico, Air Canada, Alaska Airlines, Allegiant, American Airlines, Cape Air, Delta Air Lines, Etihad Airways, Hawaiian Airlines, JetBlue Airways, Seaborne Airlines, Southwest Airlines, Sun Country Airlines, United Airlines, Virgin America and WestJet.

Passengers who are eligible for TSA Pre✓® include: members of the TSA Pre✓® application program, U.S. Customs and Border Protection (CBP) Trusted Traveler program, [Global Entry](#), and Canadian citizens who are members of CBP’s [NEXUS](#) program. TSA Pre✓® is also available for U.S. Armed Forces service members, including those serving in the U.S. Coast Guard, Reserves and National Guard.

Travelers flying on Aeromexico, Cape Air, Etihad Airways and Seaborne Airlines will now have the opportunity to receive TSA Pre✓® when utilizing a home-printed boarding pass, automated kiosks in the departure lobby, mobile boarding passes or boarding passes printed at the airport check-in desk.

If an Aeromexico, Cape Air, Etihad Airways or Seaborne Airlines passenger is eligible for expedited screening, a TSA Pre✓® indicator will be embedded in the barcode of the boarding pass so that when scanned at the checkpoint, the passenger may be referred to a TSA Pre✓® lane. The airline will also print a TSA Pre✓® indicator directly on the boarding pass so passengers will know in advance that they have been cleared for expedited screening.

As always, TSA continues to incorporate random and unpredictable security measures both seen and unseen throughout the airport. All travelers will be screened, and no individual will be guaranteed expedited screening.
